## PERSONAL STATEMENT

Full-stack developer with hands-on experience building Shopify storefronts, Flask applications, and automation tools for real e-commerce operations. Progressed rapidly from warehouse operations to leading web development projects, combining technical skill with commercial awareness. Now seeking a developer role where I can contribute to real products while continuing to grow in React, Python, and API-driven systems.

## CURRENT LEARNING / GOALS

Currently expanding front-end development expertise by learning the React framework, building on a strong foundation in JavaScript to enhance versatility and broaden framework proficiency.

Actively studying Slovak with the goal of becoming bilingual, enabling fluent communication with native speakers and strengthening personal and cultural connections.

Deepening experience with API integration in a commercial setting, focusing on optimizing order processing workflows by retrieving and manipulating data to improve operational efficiency.

## Personal Project | 2025

- Designed and developed a custom Flask application to streamline morning operations and automate key Linnworks workflows.
- Integrated directly with the Linnworks API to extract and manipulate order data from multiple e-commerce platforms using Pandas and JSON serialization.
- Built logic to detect duplicate customer orders based on matching delivery addresses, enabling automated postage prioritization and one-click merging of non-printed orders.
- Implemented a system for storing international shipping labels to support VAT inspection compliance and improve record-keeping.
- Gained deeper understanding of API data structures, order lifecycle management, and operational bottlenecks, resulting in a tool that significantly reduces manual intervention and improves efficiency.

## Personal projects | 2026

- Implemented a title analysing script using Tkinter for an easy to build UI to make the script efficient to use, this script takes up to 6 titles copied from eBay and compares the words in common and bgrams (words use in conjunction of each other), this then produces a table with the keywords and bgrams so you can analyse and see patterns with the most popular sold items sold on eBay.

## My Current Role and Responsibilities

### Dates of Employment ( Nov 2022 – Present)

#### Racebikebitz – E-commerce & Web Development Specialist

- Progressed from warehouse operations (picker/packer) to a multifaceted role encompassing e-commerce management and web development.
- Managed and optimized product listings across major platforms including eBay, Amazon, and B&Q, ensuring accuracy, SEO alignment, and platform compliance.
- Photoshop: learned to create banners and icons for websites and e-commerce platforms
- Photography: my other responsibility is to take product photos for all the new products and this also includes for the parent website racebikebitz.com.
- Social media: with the power and free advertising you get from using social media I have been tasked with running the two websites social media on Facebook, Instagram and Tik tok
- Spearheaded the development of the company's Shopify websites, focusing on user experience, maintainability, and scalability. Currently leading the build of a second, more advanced site designed to streamline future updates for both technical and non-technical users. Link to my projects:

Welcome to Get My Tools! — getmytools (<https://getmytools.com>)

Silicone Hose Store – Silicone Hose Store (<https://siliconehosestore.com/>)

#### What I Contributed Racebikebitz | 2025

- Spearheaded the end-to-end development of a bespoke Shopify storefront for a new silicone hose store, following the successful launch of Get My Tools.
- Built the site entirely from scratch without relying on paid themes, implementing all custom features and enhancements through hand-coded Liquid, HTML, CSS, and JavaScript.
- Applied lessons learned from previous projects to streamline development, improve maintainability, and enhance user experience.
- Integrated SEO best practices from the ground up, including structured metadata, performance optimization, and keyword targeting.
- Currently undergoing training in Google Ads to support paid search campaigns and further boost organic visibility through data-driven SEO testing and refinement.

## SKILLS & ABILITIES

Demonstrated consistent professional growth through hands-on experience and ongoing self-directed learning. Proactively pursued additional training alongside full-time employment to enhance my value within organizations and stay ahead of industry developments.

- **Frontend:** HTML, CSS, JavaScript, React (beginner), Liquid, Bootstrap
