Application & Benefits

- Automotive & Motorsport
- Coolant & Radiator Systems
- High-Temperature Resistance
- High Burst Pressure

Recommended Clamps

We recommend using JCS Hi-Grip clamps, which are also available for purchase on our website and will help ensure your product retains its lifetime warranty.

These clamps are our preferred choice because they feature smooth, rounded edges and have no perforated slots. This design minimises the risk of hose damage, provided they are not over-tightened.

Example of the
wrong clamps
