

Aaron George Anthony Storey
E-commerce Product Manager | Operations & Digital Strategy
Royston, England, UK | 07944 045887 |
storeyaaron7@gmail.com

Professional Profile

Results-oriented E-commerce Professional with a proven track record of scaling digital storefronts and optimizing complex operational logistics. Expert at bridging the gap between technical development and physical warehouse efficiency, having successfully driven a 400% increase in Shopify sales volume. Specialized in centralizing product data via Linnworks and utilizing SEMrush to execute data-driven SEO strategies.

Core Competencies

Product Information Management (PIM): Centralizing and syndicating product data across Shopify, eBay, Amazon, and B&Q via Linnworks.

Growth Strategy: Scaling low-volume stores through SEMrush analysis, backlink monitoring, and SEO performance tracking.

Operational Excellence: Reducing picking errors and optimizing "path-to-pick" warehouse logistics through custom logic.

Internal Tooling: Designing and deploying Flask/Python applications to automate manual workflows.

Key Professional Experience

E-commerce & Web Development Specialist | Racebikebitz Jan 2020 – Present

Revenue Growth: Scaled two Shopify storefronts from ~1 sale per month to consistent weekly sales, driving a **400% increase in revenue** through custom Liquid development, UX improvements, and targeted SEO optimisation.

SEO & Analytics: Utilized SEMrush to monitor SEO ratings and backlink profiles, ensuring continuous improvement in search rankings and organic traffic.

Centralized Data Management: Acted as "Product Owner" for the catalog, managing all product data within Linnworks and exporting optimized listings to multiple global marketplaces.

Logistics Optimization: Re-engineered order fulfillment by customizing print-out templates and sorting logic by warehouse zone, significantly reducing picking mistakes.

Product Roadmapping: Developed visual project plans (PowerPoint-based) to architect site navigation and align stakeholders before development.

Process Automation: Built a custom Flask application using Pandas and JSON to automate morning operations and eliminate manual data entry.
