TECHNICAL PROFILE

Dynamic Full-Stack Developer with a background in e-commerce optimization and custom theme architecture. Specialist in building high-conversion platforms using **Liquid, Python, and Django**. Proven ability to bridge the gap between complex data management and user-centric frontend design. Successfully scaled online operations by 150% through bespoke automation scripts and technical SEO audits.

TECHNICAL SKILLS

- **Frontend:** JavaScript (ES6+), React, HTML5, CSS3, Liquid (Shopify), Bootstrap.
 - **Backend & Data:** Python (Django), SQL, Tkinter (Desktop GUI), REST APIs.
 - **Performance & Ops:** Technical SEO, Web Vitals Optimization, Git/GitHub, Photoshop.
 - **Ecommerce:** Shopify (Advanced Custom Development), Marketplace Integrations.
-

KEY TECHNICAL PROJECTS

Language Learning App | React

- Developed a specialized word-matching application to facilitate Slovak language acquisition.
- Built core logic for state-managed matching mechanics and interactive UI components.

- **Tech:** React, JavaScript, CSS.

Competitor Analysis Tool | Python (Tkinter)

- Created a custom desktop application to perform n-gram analysis on marketplace titles.
- Automated the identification of high-performing keyword patterns, replacing manual data entry.
- **Tech:** Python, Tkinter, Data Parsing.

Bespoke Shopify Architecture | Liquid, JS, CSS

- **Project:** siliconehosestore.com
 - Engineered a custom theme from scratch, bypassing heavy third-party templates to ensure a lean, high-performance codebase.
 - **Optimisation Win:** Solved critical site-speed issues by implementing custom image-rendering logic and asset minification, directly impacting SEO rankings.
-

PROFESSIONAL EXPERIENCE

Racebikebitz | *E-commerce & Web Development Specialist* | Nov 2022 – Present

- **Full-Stack Development:** Lead developer for two Shopify storefronts, utilizing **Liquid** and **JavaScript** to build custom features that templates couldn't provide.
 - **Database Management:** Leveraged **Django** for backend data handling and performed **SQL** queries to manage complex product inventories across multiple platforms.
 - **SEO Engineering:** Conducted deep technical audits to improve Core Web Vitals, resulting in a **150% increase** in daily order volume (from 40 to 100 orders).
 - **Process Automation:** Built internal scripts to streamline product listing workflows across eBay, Amazon, and B&Q.
-

EDUCATION

- **Diploma in Full Stack Software Development** | Coding Institute | University of the West of Scotland
 - *Focus:* E-commerce applications, Django Framework, SQL database management.
- **Level 2 & 3 Certifications** | Various Awarding Bodies (Security, Leisure, & Safety).
